## 181. Older People's Health and Wellbeing Profile

**PUBLIC HEALTH**  
WARWICKSHIRE

Friday 8 April 2016

Source: <http://fingertips.phe.org.uk/profile/older-people-health> (published 7 April 2016)

### Summary

This new profile has been published by Public Health England. The Older People's Health and Wellbeing Profile can be used to examine the health and care of older people across local authorities in England. This tool enables identification, comparison and monitoring of trends through interactive charts of 95 indicators.

The indicators presented in the profile underline the scope to improve health outcomes by ensuring that all older people receive the opportunities, care and support delivered in the best-performing localities.
